Julius Bär

Julius Baer (Middle East) Ltd – Digital Assets Services

Julius Baer (Middle East) Ltd ("**JBME**") is authorised by the Dubai Financial Services Authority, under a Category 4 Licence to provide Arranging services in relation to Crypto Tokens[1] to Professional Clients and Market Counterparties[2]. JBME does not provide Advisory services in relation to Crypto Tokens and does deal with Retail Clients in any capacity. Please refer to the DFSA public register for further information in relation to JBME's regulatory authorisations.

The risks involved in trading Crypto Tokens can be substantial as they are subject to extreme volatility, meaning the value of the Crypto Token can fall as quickly as it can rise.

Crypto Token Investors **may lose all, or part, of their investment** as Crypto Tokens may be subject to a higher risk of market abuse, market and/or price manipulation, and insider dealing by market participants than traditional assets, due to valuation challenges as well as a lack of regulation, supervision, market control, centralised price source, and/or liquidity.

Crypto Tokens may not always be liquid or transferable and investments in Crypto Tokens may be complex making it hard to understand the risks with buying, selling, holding or lending them. Notably, Crypto Tokens can be stolen because of cyber attacks and investors should be aware that investing in, and holding, Crypto Tokens is not comparable to investing in traditional investments such as conventional securities.

For further information in respect of the risks of trading Crypto Tokens, please refer to the Bank Julius Baer & Co. Ltd **Special Terms and Conditions for Digital Assets** and **Risk Disclosure Statement for Digital Assets**, copies of which can be obtained directly from your Relationship Manager.
